**PRACTICAL CLINICAL COURSES**

**PROCEDURE FOR RECEIVING**  
**CE CREDIT FOR VIDEO COURSES**

1. Complete the enclosed Post-Test.\* For each **CE Video Purchased**, one test is included. If additional tests are needed, the following fees will apply: \$25 per test for 1 additional dentist; \$10 per test for each auxiliary (dental assistants, hygienists, lab technicians - no limit on auxiliary tests). Fees can be paid either by check or credit card when tests are submitted to Practical Clinical Courses.
2. Complete the demographic information located at the end of the test.  
**Type of Credit:**
  - a. If the applicant selects "State," PCC will issue a certificate of verification to the applicant. The applicant must then submit this certificate to their state board to obtain credit.
  - b. If the applicant selects "AGD," PCC will submit credit information to the Academy of General Dentistry and confirmation to the applicant that it has been submitted (the applicant may check their AGD transcript for verification – please allow 30 days).
  - c. If the applicant selects "Both," PCC will complete a. & b. above.
3. Return the **Post-Test portion** via mail, fax, or email. Our contact information is as follows:

**Practical Clinical Courses**  
**3707 N Canyon Road**  
**Suite 3D**  
**Provo, UT 84604**  
**Fax: (801) 226-8637**  
[info@pccdental.com](mailto:info@pccdental.com)

4. Practical Clinical Courses will correct the Post-Test. **Passing scores are 70% or higher.**

***\*TO OBTAIN CE CREDIT ONLINE:*** Login or create an account on [www.pccdental.com](http://www.pccdental.com) and select "My CE Tests" from the left-side menu. Click on the video title to take the test online. **RESULTS ARE IMMEDIATE.** Missing the test? Contact us at 800-223-6569 during our business hours of 7:00 a.m. – 4:00 p.m. MST to add it to your account.

The techniques and procedures on this videotape are intended to be suggestions only. Any licensed practitioner viewing this presentation must make his or her own professional decisions about specific treatment for patients. PCC is not responsible for any damages or other liabilities (including attorney's fees) resulting, or claimed to result in whole or in part, from actual or alleged problems arising out of the use of this presentation.

## **PROGRAM**

### **V3522 Rubber Dam — Still the Best Dry-Field Technique!**

## **CLINICIAN RESPONSIBLE**

**Gordon J. Christensen, DDS, MSD, PhD**  
Founder and CEO, Practical Clinical Courses  
Senior Consultant & Previous CEO, CR Foundation  
Practicing Prosthodontist, Provo, Utah

## **GOALS & OBJECTIVES**

At the completion of this video presentation, participants should be able to accomplish the following:

1. List potential uses for rubber dam.
2. Describe advantages of rubber dam use.
3. Describe disadvantages of rubber dam use.
4. Discuss the various physical characteristics of rubber dam.
5. List two prominent rubber dam companies.
6. Discuss the potential for latex allergies.
7. Describe when non-latex rubber dam would be indicated.
8. Discuss when to use the various sizes of rubber dam.
9. Discuss the importance or significance of the color of rubber dam.
10. Describe non-conventional rubber dam.
11. Discuss locations for use of resin-based composite rubber dam substitutes.
12. Discuss acceptable use of a rubber dam punch to avoid denting the punch platform.
13. List nine rubber dam clamps and where in the mouth to use them.
14. Discuss reasons for using rubber dam lubricant.
15. Discuss reasons for use of a rubber dam napkin.
16. Describe use of Wedjets.
17. List potential problems related to use of rubber dam.
18. Describe an acceptable rubber dam procedure step-by-step.
19. Describe the reason for inverting the rubber dam around each tooth.
20. Discuss special uses of rubber dam as described in this video.

## OVERVIEW

### **V3522 Rubber Dam — Still the Best Dry-Field Technique!**

Rubber dam has been used in dentistry for over 150 years. It is well known to provide significant advantages, but many dentists do not use rubber dam routinely. Many reasons are related to their decision to avoid using rubber dam. Probably the perception that rubber dam placement is time-consuming and costly has impeded its use, but neither opinion is valid.

Properly educated staff persons can place a rubber dam in a few minutes and the clinical time savings during the treatment period is significant.

Some of the advantages of rubber dam use are:

- Provides optimum vision and physical access
- Provides a dry uncontaminated field
- Retracts the cheeks, lips, and tongue
- Controls throat access and prevents swallowing or aspiration of objects
- Patient cannot talk or expectorate
- Helps to control spread of infectious organisms
- Patient has a feeling of safety
- Helps clinician to accomplish higher quality dentistry

Disadvantages of rubber dam use are:

- Requires some time to learn fast, effective placement procedure
- A few patients become claustrophobic
- Latex allergies
- Slight cost
- Some time is required to place the dam

Equipment and supplies necessary for rubber dam use are:

- Punch
- Frame or holder
- Assortment of clamps
- Clamp forcep or holder
- Lubricant
- Rubber dam napkins
- Wedjets
- Waxed floss

This video shows step-by-step procedures for placing the rubber dam in typical locations plus for some special situations. Rubber dam is a highly advantageous adjunct for producing high quality dentistry.

## POST-TEST

### **V3522 Rubber Dam — Still the Best Dry-Field Technique!**

1. Proper rubber dam placement:
  - a. requires significant time.
  - b. requires a dentist and an assistant.
  - c. is a difficult procedure.
  - d. is expensive.
  - e. none of the above.
  
2. Rubber dam is available in the following thickness:
  - a. thin at .004".
  - b. medium at .005".
  - c. heavy at .006".
  - d. extra-heavy at .009".
  - e. none of the above.
  
3. The most commonly used type of rubber dam is:
  - a. latex.
  - b. non-latex.
  - c. 4"x 5".
  - d. 6"x 5".
  
4. The color of the rubber dam is:
  - a. highly important.
  - b. moderately important.
  - c. slightly important.
  - d. not important.
  
5. In a typical rubber dam placement for restorative dentistry on the anterior teeth, it is desirable to place the clamp on:
  - a. the anterior teeth.
  - b. the premolars.
  - c. the first molar.
  - d. the second molar.
  
6. The #W4 clamp is designed to be used:
  - a. on anterior teeth.
  - b. on premolars and molars.
  - c. as a class V clamp.
  - d. on small molars.
  
7. Winged rubber dam clamps:
  - a. may restrict access to the operating site.
  - b. are easier to place than wingless clamps.
  - c. are smaller than wingless clamps.
  - d. are intended for molars only.

**POST-TEST (CONT'D)**

**V3522 Rubber Dam — Still the Best Dry-Field Technique!**

- 8. A 6"x 6" rubber dam is usually used for:
  - a. typical adult restorative dentistry.
  - b. typical pediatric dentistry.
  - c. endodontic therapy.
  - d. all of the above.
  
- 9. Heavy and extra-heavy rubber dam:
  - a. retract gingival tissues well.
  - b. retract lips, cheeks, and tongue well.
  - c. are slightly more difficult to place into tight contact areas than thinner dam.
  - d. all of the above.
  
- 10. Wedjets are:
  - a. available in latex only.
  - b. used for holding a rubber dam down in situations where tooth contact areas are loose.
  - c. for lower anterior teeth only.
  - d. for molars only.
